RESOLUTION

1. The Board of Directors for Portland Public Schools accepts the Superintendent's recommendation to open 450 slots for non-resident students to transfer into PPS.
2. The Board directs the Superintendent and his delegates to allocate PPS slots by school and grade level, and to follow these priorities in the event of more applicants than space:
 - Prioritize students currently enrolled in schools who had legal change of residence into the PPS district during the school year or over the summer over requests from new students.
 - Prioritize new students with co-enrolled siblings over new students without co-enrolled siblings.
 - Use random numbers as tie-breakers if needed.
3. The Board accepts the Superintendent's recommendation for inter-district transfer agreements into PPS to remain in effect through the highest grade of the approved school.
4. The Board further directs that students who meet the following criteria be released to their requested districts, so long as they apply by September 1, 2017.
 - Students who had a legal change of residence into the PPS district during the school year or over the summer, and who wish to remain in their current district.
 - Students who will have a sibling enrolled in their requested school next year.
 - Students who were enrolled in their requested districts as 11th graders in the 2016-17 school year.
