

The Successful Schools Survey is our annual district-wide school climate and feedback survey. These surveys provide students, families, staff, and leaders an opportunity to provide feedback

Families will take the survey online as well, but paper surveys will be made available when needed. All surveys will be translated into PPS's five supported languages: Spanish, Russian, Somali, Vietnamese, and Chinese.

School principals will need to identify a survey coordinator that supports administration of the survey at their site. Surveys will be done electronically, so it will require coordination of technology. The survey should take no more than 20 minutes to complete. Principals will be asked to provide time for staff to take the survey during the work day, however the survey can be completed at anytime during the survey window.

The goal for participation is 50% for the family survey and 100% participation for students, staff, and leaders. This will ensure results are representative of our students and families. System Planning & Performance will provide weekly updates on response rates for survey coordinators and school principals.
