

CONCRETE POLISHING COUNCIL POLISHED CONCRETE APPEARANCE CHART

REPLACES CPAA FINISHED GLOSS CHART

LEVEL	NAME	DISTINCTNESS-OF-IMAGE (DOI) GLOSS	IMAGE CLARITY VALUE, %	HAZE INDEX
1	Flat (Ground)	Images of objects being refected have a fat appearance.	0 – 9	<10
2	Satin (Honed)	Images of objects being refected have a matte appearance.	10 – 39	
3	Polished	Images of objects being refected do not have a sharp and crisp appearance but can be easily identifed.	40 – 69	
4	Highly Polished	Images of objects being refected have a sharp and crisp appearance as would be seen in a near-mirror like refection. May require grouting.	70 – 100
